# Parks Master Plan

# 2005

City of Saint Peter

Memorandum

**TO:** Honorable Mayor & City Council Members **DATE:** 11/16/2005

**FROM:** Lewis G. Giesking, Director of Public Works; Jane Timmerman, Director of Recreation & Leisure Services

**RE:** Parks Master Plan – Executive Summary

A parks master plan was last prepared in 1997, a trail master plan was adopted March 22, 1998 and a sidewalk master plan was adopted February 1991. Since that time two new parks have been established - Warren Park (Neighborhood Park) and Gault Park (Outdoor Sports Complex) and trails and sidewalks have become an important part of the park system. A tornado in March 1998 caused severe damage to park facilities, throughout the park system. These facilities were reconstructed using 1997 Parks Master Plan as the guide. The City Council, in 1999, established a growth boundary for the city which would double the area of the city. It is time to reevaluate the existing parks system and facilities and to determine the park system and facilities necessary to serve citizens in a fully developed city within the established growth boundaries.

The Standards for Public Recreation Facilities used as a guide for city park development were established for the city in 1977. The standards were reviewed and have been adjusted in titles for park types and service areas to comply with current national and state standards. These new standards were recommended by the Parks and Recreation Advisory Board and adopted by the City Council in 2002 and 2005, and were used by the Board to plan a park system to meet the city's needs and desires within the growth boundaries.

The city has 93.75 acres of general use city parks and 715 acres of land preserved as natural resource areas with current replacement value of $10,403,723.96. The existing parks were evaluated for: 1) compliance with federal and state standards; 2) meeting changing citizen expectations; and 3) meeting the needs of a growing population. Improvements are set out in priority categories: A) improvements to be funded through annual budgets; B) lesser priority items to be funded by city funds; C) lower priority items to be funded from other sources such as donations, grants or other sources.

The master plan proposes a system of four (4) new neighborhood parks, ten (10) mini -parks, three (3) specialty parks and an additional community park/sports complex park for the undeveloped area west and north of the city, all to be interconnected with a greenway, trail system. The area of parks and types of parks were determined based on an anticipated population of 20,000, when the entire area within the growth boundary is developed. This plan is not based on a specific time frame due to uncertainty in growth pattern. Establishing the size and location of future parks allows for the city to set aside land as it becomes available or as development occurs, and coordinate park development with the development of the new storm water detention basins. The specific amenities for each new park would be planned at the time land becomes available for developing.

Three specialty parks are identified as desirable: skateboard park, BMX park and a park for dog exercise. A new indoor recreation center is recommended to be located northwest of the high school. The Hallett's Pond area is recommended to be designated as a park and additional city

owned land along the river is recommended to be added to the Traverse des Sioux Natural Resource area.

Natural Resource areas are abundant in the Saint Peter area and seventeen additional areas are identified for city support for preservation, development or expansion for the future. Some of these areas already are being preserved and/or maintained by the Regional Treatment Center, Department of Natural Resources, or Gustavus Adolphus College

This Parks Master Plan will be the basis for updating the trail master plan, sidewalk master plan and developing a ten-year funding plan to begin the implementation of this master plan. The master plan will alert current land owners of the city's future park needs and provide developers a guideline for planning new development. The plan will also be a basis for the costs to be charged to developers to fund the expansion of the park system.

LGG/JLT/vwt

# PARKS MASTER PLAN DEVELOPMENT

The Parks Master Plan has been developed over the past two years. The following Park Board members have developed the plan:

- Joel Brinker, Board Member
- Ron Davis, Board Member
- Tom Freeman, Board Member
- Dave Johnson, Board Member
- Deb Johnson, Board Member
- Steve Kjellgren, Board Member
- Harriet Mason, Board Member
- Patrick Schroepfer, Board Member
- Rick Tuomala, Chairperson
- Deidra Willson, Board Member

Retired Park Board Members who also had input into the Parks Master Plan:

- Scott Fichtner, Chairperson
- Pam Harpestad, Board Member
- Leon Miller, Board Member
- Chuck Petry, Board Member
- Nancy Torrison, Board Member
- Nancy Zallek, Vice-Chairperson

City Staff:

- Windy Block, Maintenance Superintendent
- Dan Ehrke, Recreation and Leisure Program Supervisor
- Lewis Giesking, Director of Public Works
- Barb Luker, Executive Secretary
- Valerie Thrower, Administrative Secretary
- Jane Timmerman, Director of Recreation and Leisure Services

City Council Members:

- Jerry K. Hawbaker, Mayor
- Joel Brinker, City Council Member
- Ken Douglas, City Council Member
- Mary Gover, City Council Member
- John Kvamme, City Council Member
- Jerry Pfeifer, City Council Member
- Tim Strand, City Council Member
- Todd Prafke, City Administrator

Recommended by the Parks and Recreation Advisory Board on October 20, 2003

Revised and recommended by the Parks and Recreation Advisory Board on July 19, 2004

Summary approved for comprehensive plan by the Planning and Zoning Commission on August 3, 2004

Revised and recommended by Parks and Recreation Advisory Board on July 18, 2005

Adopted by the City Council on November 28, 2005

CITY OF SAINT PETER, MINNESOTA

RESOLUTION NO. 2005 - 182

STATE OF MINNESOTA)
COUNTY OF NICOLLET)
CITY OF SAINT PETER)

**RESOLUTION ADOPTING PARKS MASTER PLAN UPDATE**

WHEREAS, the Parks and Recreation Advisory Board initiated an update to the unofficial 1997 Parks Master Plan on November 20, 2000; and

WHEREAS, the City Council adopted revised standards for park development on September 30, 2002; and

WHEREAS, the Parks and Recreation Advisory Board recommended the Parks Master Plan to the Planning and Zoning Commission and City Council on October 20, 2003; and

WHEREAS, the Parks and Recreation Advisory Board met jointly with the Planning and Zoning commission on April 6, 2004 to discuss the Parks Master Plan; and

WHEREAS, the Planning and Zoning Commission recommended changes to the Parks Master Plan on May 18, 2004; and

WHEREAS, the Parks and Recreation Advisory Board reviewed the suggested changes by the Planning and Zoning Commission in June and July and recommended the revised plan on July 19, 2004; and

WHEREAS, the Planning and Zoning Commission included a summary of the Parks Plan in the City's Comprehensive Plan recommended to the City Council on August 3, 2004; and

WHEREAS, the City Council reviewed the Parks Master Plan at a goal session on December 15, 2004 and workshops on April 4, 2005, October 3, 2005, and November 7, 2005; and

WHEREAS, the Parks and Recreation Advisory Board discussed City Council comments and made changes at meetings on April 18, 2005, May 16, 2005, July 18, 2005, and October 17, 2005; and

WHEREAS, the Parks and Recreation Advisory Board is recommending the adoption of the plan with changes suggested; and

WHEREAS, the City Council adopted a revised standards for park development to include the category of mini-parks on November 28, 2005.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SAINT PETER, NICOLLET COUNTY, MINNESOTA, THAT: the City Council hereby adopts the 2005 Parks Master Plan.

Adopted by the City Council of the City of Saint Peter, Nicollet County, Minnesota, this 28th day of November 2005.

Jerry K. Hawbaker
Mayor

## SAINT PETER PARKS PLAN
## INTRODUCTION

The park system in Saint Peter has been successful in meeting the needs of residents and the area population. This has been accomplished through the recognition by many people of the need for parks as a key component of the quality of life in a community and their support for the continued improvement and maintenance of parks. The process began with parks set aside as a part of the original plat of the city and has continued with the establishment of new parks as the city has grown.

Parks were initially set up as a place for outdoor community gatherings and a place for urban families to enjoy the outdoors in picnic areas and playgrounds. Parks not only continue to serve those key functions, but now also serve a number of other functions. Park trails and sidewalk systems provide a way for runners and walkers to exercise and bicycles are using trails as much as roadways. The growing interest of in-line skates, skateboarding, and rollersking have placed additional demands on the parks and trails. The evolution of parks has included the creation of parks for the preservation of natural geologic features of an area or as wild life preserves. These have become much more important as the population grows and development expands into every available area.

Parks have also evolved in areas designated for competitive sports. Baseball and softball were the early adult competitive sports; however, park planners must now consider soccer, lacrosse, frisbee golf, skateboard areas, paint-ball contests, model airplanes and cars, dog exercise areas, dirt bike tracks, etc. These competitive sports now include all age groups and both male and female teams.
The city developed a Recreation Department in 1987 as a response to increasing demands for children's programs including sports programs. A baseball and hockey association existed at the time. The city now also has a softball association, a basketball association, a tennis association, and a soccer association. These groups all look to the city to provide facilities in parks for their particular activity.

Safety and handicapped accessibility are enforced as components of a successful park system. New safety issues surface annually with new solutions based on experience and new materials. Safety and handicapped access have also affected park design requiring larger areas to provide ramps, added space for activities for the handicapped and added space for safety between equipment and between

sports fields. Safety considerations include design of a park to minimize vandalism, which could create unsafe situations for other park patrons.

The planning for park system expansion would consider the comprehensive plan for the city, growth of the city, population demographics, and changing needs or demands of the citizens. The growth of Saint Peter has accelerated in the last five years, reducing the time frame for expansion of the park system to meet the needs of a growing population. The growth of the boundaries of the city has been tentatively established by the City Council as the Regional Treatment Center on the south, Robart's Creek on the north and the bluff line to the west. The population in this area could grow to exceed 20,000; therefore, land should be set aside to meet the park needs of a city of 20,000 in population. Unique areas and features in this area should also be identified for protection from development, in order to preserve them for enjoyment by generations to come. The city has a plan for storm water detention basins, which will become wetlands and nature areas as they are developed and as they age.

The average age of the population in Saint Peter has increased over the past several years and is anticipated to continue to increase in the near future. However, the nature of the regional area, in which the City of Saint Peter is located, and the city's location on a major highway, being upgraded to a freeway, provides impetus for the city to grow similar to a metro suburb. The presence of a small college, a quality school system, proximity to a quality shopping area, a quality up-to-date infrastructure and low taxes and utility rates are expected to attract people, especially younger families with children. Therefore, it is planned that a park system for 20,000 population will require double the activity park area of the current city of 10,000 population.

The addition of a Recreation Department also involved the city in indoor activities including a gym, meeting rooms, and clubs. Demands for indoor facilities are continuing to grow especially for additional gym space for basketball, volleyball, indoor soccer, dance, and practice space for outdoor sports, walking, soccer, and running. People want opportunities for exercise in all weather conditions, year round. There is also demand for indoor ice to expand the season for hockey and ice skating.

The park plan which follows has two components; improvements to existing parks and a plan for expansion of the park system to meet the needs of a population of 20,000.

**CITY OF SAINT PETER, MINNESOTA**
**Parks and Recreation Advisory Board**

**RESOLUTION NO. 2004 –**

**STATE OF MINNESOTA)**
**COUNTY OF NICOLLET)**
**CITY OF SAINT PETER)**

**A RESOLUTION RECOMMENDING THE PARKS MASTER PLAN WITH PROPOSED CHANGES**

WHEREAS, comments on the Parks Master Plan were received from the Planning and Zoning Commission; and

WHEREAS, some of the proposed changes would enhance the city's park system; and

WHEREAS, the city has been actively developing and maintaining city parks since the city was incorporated; and

WHEREAS, city growth is accelerating and there are changing citizen demands for park facilities; and

WHEREAS, the city has in the past five years, reconstructed most of the facilities in the major city parks; and

WHEREAS, land costs and the cost of developing parks is increasing rapidly; and

WHEREAS, a goal is to promote park planning updates on a regular basis; and

WHEREAS, the future development area of the city is proposed to have a 130-acre new park; however, it did not include a "community park" for a city of 20,000; and

WHEREAS, natural resource areas should be preserved for future generations.

NOW THEREFORE, BE IT RESOLVED BY THE PARKS AND RECREATION ADVISORY BOARD OF THE CITY OF SAINT PETER, NICOLLET COUNTY, MINNESOTA, THAT: the Parks and Recreation Advisory Board recommends the adoption of the parks master plan with the following additions: The Parks Master Plan identified the improvements in existing parks and proposes the addition of new parks.

- The value of the underground portion of the existing swimming pools will be added to the value charge on page 24 of the Master Plan.
- The west area of the water tower site would be proposed for a BMX dirt bike track.
- Add shaded benches in parks and along trails.
- The neighborhood park area of Gault Park will be identified in the parks plan on page 43 and page 45.
- Shaded observation areas will be proposed for watching events at fields (page 43).
- A category for swimming pool improvements will be added to page 109A of the parks plan. It will include a minimum water feature and a water slide as a planned improvement; a section discussing the swimming pool will be added to the parks plan as page 109B.
- Seating, retaining wall and a fence along the Veterans Tennis Courts will be added as improvements on page 109A.
- A Community Park/Sports Complex is proposed at an 80-acre park at the south end of the development area that would serve the purpose. The modification would occur on page 117 or page 125, and page 127.
- Add disc golf to the existing facilities on page 88
- Add development of the artesian well on page 109

Adopted by the Parks and Recreation Advisory Board of the City of Saint Peter, Nicollet County, Minnesota, this 19th day of July 2004.

**CITY OF SAINT PETER**
**PLANNING AND ZONING COMMISSION**
**MEETING MINUTES -AUGUST 3, 2004**
**GOVERNOR'S ROOM – SAINT PETER COMMUNITY CENTER**

In the absence of the Chairperson and Vice Chairperson, the meeting was called to order at 7:00 p.m. by Commissioner John Kvamme.

Roll call was taken with Commissioners Kvamme, Joel Brinker, Justin Simpson and Jan Glimsdal in attendance. Chairperson Sheryl Smith and Vice Chairperson Mark Bjelland were absent. There remains a vacancy on the Commission. Community Development Director Russ Wille was also in attendance. Lewis Giesking was present representing Sunrise Assembly of God Church.

A motion was made by Simpson, seconded by Brinker to approve the agenda with the addition of the following item under the New Business. "Recommendation of the amended Comprehensive Plan and calling for a public hearing on adoption of the Plan." All voting in favor, motion carried.

A motion was made by Glimsdal, seconded by Simpson to approve the Minutes of the May 18, 2004 meeting as submitted. All members voting in favor, the motion carried.

Acting Chair Kvamme opened the scheduled public hearing regarding the annexation petition submitted by Sunrise Assembly of God Church at 7:02 p.m.

Lewis Giesking appeared before the Commission on behalf of the church. Mr. Giesking indicated that the annexation was petitioned to allow for the construction of a church addition. The annexation will allow for construction within the setback regulations contained within the zoning ordinance.

Kvamme closed the public hearing at 7:06 p.m.

A motion was made by Brinker, seconded by Glimsdal to introduce Resolution No. 2004 - 15, entitled "RESOLUTION RECOMMENDING THE ANNEXATION OF SUNRISE ASSEMBLY OF GOD CHURCH PROPERTY AND R-2 ZONING DESIGNATION". With no further discussion, all voting in favor, the Resolution was passed and adopted.

A motion was made by Simpson, seconded by Glimsdal, to add the Parks Plan Executive Summary and accompanying maps to the draft version of the Saint Peter Comprehensive Plan and to call for a public hearing on the adoption of the plan for September 14, 2004 at 7:00 p.m. in the Governor's Room of the Saint Peter Community Center. Members Glimsdal, Simpson and Brinker voted aye, member Kvamme voting nay, the motion carried.

With no further business before the Commission, Acting Chair Kvamme adjourned the meeting at approximately 7:11 p.m.

**RESOLUTION** 2005-01

**STATE OF MINNESOTA)**
**COUNTY OF NICOLLET)**
**CITY OF SAINT PETER)**

**A RESOLUTION RECOMMENDING THE PARKS MASTER PLAN FOR ADOPTION BY THE CITY COUNCIL WITH SOME CHANGES AS PER THE CITY COUNCIL DISCUSSION**

WHEREAS, the Parks and Recreation Advisory Board initiated the update to the 1997 Parks Master Plan on November 20, 2000; and

WHEREAS, the City Council adopted revised standards for park development on September 30, 2002; and

WHEREAS, the Parks and Recreation Advisory Board recommended the Parks Master Plan to the Planning and Zoning Commission and City Council on October 20, 2003; and

WHEREAS, the Parks and Recreation Advisory Board met jointly with the Planning and Zoning commission on April 6, 2004 to discuss the Parks Master Plan; and

WHEREAS, the Planning and Zoning Commission recommended changes to the Parks Master Plan on May 18, 2004; and

WHEREAS, the Parks and Recreation Advisory Board reviewed the suggested changes by the Planning and Zoning Commission in June and July and recommended the revised plan on July 19, 2004; and

WHEREAS, the Planning and Zoning Commission included a summary of the Parks Plan in the City's Comprehensive Plan recommended to the City Council on August 3, 2004; and

WHEREAS, the City Council reviewed the Parks Master Plan at a goals session on December 15, 2004 and at a workshop on April 4, 2005; and

WHEREAS, the Parks and Recreation Advisory Board discussed City Council comments at meetings on April 18, 2005, May 16, 2005, and July 18 2005.

NOW THEREFORE, BE IT RESOLVED BY THE PARKS AND RECREATION BOARD OF THE CITY OF SAINT PETER, NICOLLET COUNTY, MINNESOTA, THAT: the Parks and Recreation Advisory Board hereby recommends the Parks Master Plan for adoption by the City Council with the following adjustments made as per the City Council comments:

1. Corrected the size reference for Johnson Park to 0.14 acres (5,964 square feet); and
2. The entire inventory has been reviewed, checked against onsite conditions and values updated to 2005 values; and
3. The proposed Robarts Creek Natural Resource area will be shown on the proposed parks map (currently on page 123 of the plan); and
4. Current date on plan, editorial adjustments, changes in board members and staff members.

Adopted by the Parks and Recreation Advisory Board of the City of Saint Peter, Nicollet County, Minnesota, this 18th day of July 2005.

## STANDARDS FOR ESTABLISHING AND DEVELOPING NEW PARKS

A Standard for Public Recreation Facilities as a Guide for Future Parkland and Recreation Acquisition was originally adopted in 1977. The standard has served the city well as a guideline for acquisition; however, there are now more demands for a variety of sports complex facilities and recreational opportunities in park facilities. Staff has done extensive research which also supports a change to the standards.

The research identified a common national standard upon which most cities are building their individual standards. The proposed changes include change in titles and acreage requirements for the different categories. The new titles will be consistent with titles used in other cities and will make it easier to compare notes with other cities for park development.

The Parks and Recreation Advisory Board have recommended and the City Council adopted the New Standard on September 30, 2002 to reflect the needs and expectations of the city and its citizens for new parks and park facilities.

Changes made to the 1977 Standards for planning city parks for the future are:

**Tot Lots:** No Change

**Active and Passive Neighborhood Playgrounds:** Change the title to "Neighborhood Parks".

**Neighborhood Parks:** These parks will be sized at two and one-half acres (2 ½) per 1,000 population. These parks should range in size from five (5) acres to twelve (12) acres with a recommended minimum size of seven (7) acres for a new park. These parks should focus on informal active and passive recreation for an age group of six (6) to fourteen (14) and families. The service area for these parks would be one (1) mile in diameter centered on a park.

The underlined items are the changes to this section. This park is the basic park of the park system and will have an absolute minimum size of five (5) acres rather than the past three (3) acres. The increase in the minimum size will allow for large informal active areas (kids ball field, soccer, etc.). The one-half (1/2) mile walking distance to the park is still an acceptable walking distance to the park.

**Playfields and Ball Parks:** Change the title to "Outdoor Sports Complex"

**Outdoor Sports Complex:** These parks will be sized at six (6) acres per 1,000 population. They will range in size from thirteen (13) acres to forty (40) acres, with a recommended minimum size of twenty (20) acres. These parks will provide facilities for competitive sports for all ages and should be located throughout the city in areas with good vehicular and pedestrian access. The general service area for these parks is two (2) miles in diameter centered on a park; however, these parks may serve the entire city for a particular sport.

The number of citizens involved in competitive sports has grown dramatically with the increase in competitive women's sports and many more competitive children's sports teams. The demand for safe competitive sport fields is rising not only for ball field sports but also for a larger variety of sports. Therefore, the number of acres per 1,000 population was increased from one and one-half (1 ½) acres per 1,000 population to six (6) acres per 1,000 population. The size for planning purposes is based on other cities with similar experiences and the number is based on current actual conditions with the city. The minimum size of these parks is based on the minimum actual size of two of Saint Peter's Parks (Jefferson and Veteran's Memorial). However, both parks lack adequate off street parking and there is little or no open space between competitive fields. Therefore, the minimum recommended size of future sports parks is twenty (20) acres. The maximum size for these parks should increase to forty (40) acres to provide better spaces for sports fields.

**Community Parks:** These parks would be sized at seven (7) acres per 1,000 population. They will serve all age groups, for community wide events or activities. These parks may be based on unique landscapes, open spaces, historical events, or community uses and may be located anywhere in the community. They should have good vehicular and pedestrian access to the park but not necessarily into the park.

These parks are important to the interaction of the community's citizens and should help provide a sense of community among the citizens. There was no substantial change in the classification only an increased explanation of the purpose of this park.

**Special Areas:** Change title to "Natural Resource Areas".

**Natural Resource Areas:** The size of these areas would vary depending on the resource to be preserved and the buffer necessary. These areas should have pedestrian access into the area and vehicular access to the area.

Saint Peter has many unique natural resource features that should be preserved for citizen enjoyment and education. The changed title better identifies these types of areas. These areas would include the River Flood Plain areas, woodlands and storm water detention areas. These areas are not identified as parks as they would be passive areas only, intended for citizen enjoyment.

**Special Use Parks:** The size of these parks would vary according to the special use, purposes, or activity.

These are unique parks or land that does not fit other categories. Storm water detention basins would not be included in this category.

**Conservancy Area:**

This category would be removed and Conservancy Areas would be reclassified to Natural Resource Areas.

The Parks and Recreation Advisory Board has recommended that the City Council add the category of Mini Parks to the Standards for Establishing and Developing New Parks at their November 28, 2005 City Council Meeting.

The Parks and Recreation Advisory Board have recommended and the City Council adopted the New Standard on November 28, 2005 to reflect the needs and expectations of the city and its citizens for new parks and park facilities.

Changes made to the Standards for planning city parks for the future are:

**Mini Parks:** Used to address limited, isolated, or unique recreation needs. Between 2,500 square feet and three acres in size. Should be in a residential setting and be located on a sidewalk or trail for the purpose of providing additional green space in residential areas. The service area would be eight blocks (3,500 feet in diameter centered on the park.)

The addition of the category of Mini Parks addresses the concern about convenient access to the parks.

LGG/vwt

## STANDARDS FOR ESTABLISHING AND DEVELOPING NEW PARKS

a. **Tot Lots:** Should range in size from one-eighth (1/8) to one-quarter (1/4) of an acre and shall serve an age group from one (1) to five (5) years and shall have a one-eighth (1/8) of a mile walking distance and be located in the center of a development, shall serve the specific development and should be constructed and maintained by the developer.

b. **Mini Parks:** Used to address limited, isolated, or unique recreation needs. Between 2,500 square feet and three acres in size. Should be in a residential setting and be located on a sidewalk or trail for the purpose of providing additional green space in residential areas. The service area would be eight blocks (3,500 feet in diameter centered on the park).

c. **Neighborhood Parks:** The City should have two and a half (2½) acres per 1,000 population per ½ square mile. It should range in size from five (5) to twelve (12) acres with new parks a minimum size of seven (7) acres. It should serve an age group from six (6) to fourteen (14) years and families. The service area for these parks would be one (1) mile in diameter centered on a park.

d. **Outdoor Sports Complexes:** Should be six (6) acres per 1,000 population. It should range in size from thirteen (13) to forty (40) acres with a recommended minimum size of twenty (20) acres. These parks should provide facilities for competitive sports for all ages and should be located throughout the city in areas with good vehicular and pedestrian access. The general service area for these parks is two (2) miles in diameter centered on a park; however, these parks may serve the entire city for a particular sport.

e. **Community Parks:** Should have seven (7) acres per 1,000 population. These parks should serve all age groups, for community wide events or activities. These parks may be based on unique landscapes, open spaces, historical events, or community uses and may be located anywhere in the community. These parks should have good vehicular and pedestrian access to the park but not necessarily into the park.

f. **Natural Resource Areas:** The size of these areas would vary depending on the resource to be preserved and the buffer necessary. These areas should have pedestrian access into the area and vehicular access to the area.

g. **Special Use Parks** – The size of these parks would vary according to the special use, purposes, or activity.

h. **Greenways** - Greenways effectively tie park system components together to form a continuous park environment. Location and size vary depending on the availability and opportunity to develop.

i. **Park Trail** - Park Trails are multipurpose trails located within greenways, parks, and natural resource areas. Focus is on recreational value and harmony with natural environment. Type 1: Separate/single-purpose hard-surfaced trails for pedestrians or bicyclists/in-line skaters. Type II: Multipurpose hard-surfaced trails for pedestrians and bicyclists/in-line skaters. Type III: Nature trails for pedestrians. May be hard-or-soft-surfaced.

j. **Connector Trails** – Connector trails are multipurpose trails that emphasize safe travel for pedestrians to and from parks and around the community. Focus is as much on transportation as it is on recreation. Separate/single-purpose hard-surface trails for pedestrians or bicyclists/in-line skaters. Typically located within road right-of-way.

k. **Snowmobile Trails** –Snowmobile trails are trails specifically used by snowmobile riders.

The City has a number of existing parks developed to meet citizen needs. These parks generally meet the requirements establish to provide the city with a comprehensive park system.

| Required Park Land | Required Acres Based on 10,000 population | Actual Park Land | Parks Included |
|---|---|---|---|
| Tot Lots | No requirement | | Gorman Park<br>Jefferson Park<br>Mill Pond<br>Minnesota Square<br>Pioneer Apartments<br>Summit Homes<br>Veterans Memorial Park |
| Neighborhood Parks<br>2 1/2 acres per 1,000 population<br>*2 | 25 | 18.02 | Elementary School (4.6) *3<br>Gorman Park (4.85)<br>Intermediate School (2.5) *3<br>Ramsey Park (3.17)<br>Warren Park (2.9) *1 |
| Outdoor Sports Complexes<br>6 acres per 1,000 population | 60 | 59.04 | Gault Park * (19.9)<br>High School (12.3) *3<br>Jefferson Park * (13)<br>Veterans Memorial Park * (13.84) |
| Community Parks<br>7 acres per 1,000 population | 70 | 36.08 | Levee Park (1.38)<br>McGill Park (9)<br>Minnesota Square (10.85)<br>Riverside Park - Mill Pond (12.5)<br>Stones Park (2.35) |
| Natural Resource Areas | No requirement | 675 | Riverside Park Extension (80)<br>Riverside Park Nature Area (215)<br>Traverse des Sioux Park (380) |
| Special Use Parks | No requirement | 40.01 | Jefferson Park West (40)<br>Johnson Park ( .14) |

**LEGEND:**
( ) Land area for individual park
* These three parks also have playgrounds for neighborhood use
*1 Warren Park is planned to grow to 7.5 acres
*2 Hallett's Pond is planned as a future neighborhood park (18.03 acres total including 4 acres of land) - There is an additional 0.4 acres of water that is privately owned
*3 Areas for school only include the ballfields and playground areas

The replacement value of the park system is substantial. The investment has been accomplished through city investment, city staff, contributions, developers, and volunteer labor. Together this has resulted in a quality low maintenance park system.

Transportation:

Consideration for the location and development of parks must be related to the access provided to the parks. To assure access to the parks, the City code requires fifty percent of the boundary of a park be adjacent to a public right-of-way. The city currently has one park, Ramsey Park, which has no right-of-way adjacent to the park. This has reduced the visibility of the park and the use of the park. The city's transportation plan does provide for right-of-way adjacent to Ramsey Park in the future.

There are three classes of transportation to consider: Motorized, non-motorized and pedestrian. The City Council has adopted a transportation plan which identified collector streets and sub-collector street locations for future development.

The City Council has also adopted a master sidewalk plan for the City, which focuses on pedestrian traffic and access to public facilities. In addition, the City Council has established a basic requirement that sidewalks will be located on both sides of every collector street installed. The Planning and Zoning Commission and City Council have been diligent in identifying pedestrian access issues for every development that has occurred in recent years. The result is an evolving sidewalk system which will serve the entire population of Saint Peter, provide access to all parks and public venues in the city.

The City Council has also adopted a trail master plan for the city to provide a system for non-motorized vehicles to move around the city and access parks and public facilities. The trail system plan also anticipates the future connection to the state system of trails. It is anticipated a state trail will be extended from Belle Plaine down the Minnesota River Valley to Mankato to connect existing components of the state trail system.

Maps of these trail systems are enclosed for your consideration of the Parks Master Plan.

## PLAN FOR IMPROVEMENTS TO EXISTING PARKS:

The existing parks have been upgraded between 1998 to 2003 due to the tornado destruction which occurred in March of 1998. The city reconstructed facilities to meet the current handicapped and safety standards. Therefore, the focus of the improvements for existing parks is on additional amenities which will improve service in each park.

The planned improvements are broken into three priorities. Priority "A" identifies items which are desired to be completed through normal city funding. These are items required to bring the park into compliance with regulations or meet current demands in the parks. Priority "B" items would be funded by city funds when "A" items are complete or by donations or grants. Priority "C" items would enhance the park activities but would only be done if outside donations or other unique sources of funds become available for one of the specific items identified.

# Gault Park
## 1901 North Sunrise Drive

Established by the City of Saint Peter
August 11, 1997 based on donation of land by
Sam Gault on October 13, 1997

19.9 acres - Outdoor Sports Complex

Development Theme:
Organized Sports and Neighborhood Park

Adopted By:
St Peter Masons/Nicollet Lodge #54 and
JOBS Daughter Bethel #9
August 22, 2003

**Park Activity Focus:**
- Neighborhood Park
- Soccer
- Softball

**Existing Facilities:**
- Regulation Soccer Fields (3)
- Regulation Softball Field (1) - 275' outfield
- Trail – West side

**Playground:**
- Steel Play Structure
  - Dinosaur Rocker
  - Climber
  - Swings (2) - Adult
  - Whirl - Small
- Tire Playground

**Additional Park Amenities:**
- Aluminum Bleachers (2)
- Drinking Fountains (5)
- Handicapped Sidewalk System
- Irrigation Hydrants (4)
- Parking Lot - 200 car

**Park Improvements Funded By Others:**
- Back stop and ball field fence - 2003 - partial funding from Adult Softball Association
- Metal Benches - 2 from Nicollet County Bank and 2 from Gault Family – 2004
- Metal Play Structure - 2004 - Saint Peter Masons/Nicollet Lodge #54
- Soccer Field Turf Development -2002-2003 - Volunteer labor from Soccer Association
- Tire Play Structure - 1997 - originally funded by Kiwanis at Gorman Park then moved to Gault Park

9/12/2005

## Planned Improvements

### Gault Park Priorities

**Priority A**

1. Restroom/Concession Stand - (24 x 44). It is proposed to construct the identical facility as constructed in Jefferson Park. It will meet the needs of Gault Park and would reduce architectural fees. Includes handicapped sidewalk connections.
2. Picnic Shelter - (24 x 44 ). Install a picnic shelter similar to the one's at Veteran's Memorial Park and Jefferson Park. It would be good to have a shaded area in Gault Park for picnics considering all the activities that will occur in the area.
3. Tot toys – Tot toys should be added to the playground to meet the needs of little children while older children are playing soccer or softball.
4. Shaded observation areas at soccer fields and softball diamonds.

**Priority B**

5. Soccer field lights – Add lights to the southeast soccer field for night time play – the city has poles and fixtures.
6. Bleachers for soccer fields – bleachers should be added to the lighted field and ultimately to all fields for parents and soccer fans. Handicapped sidewalks would be required to connect bleachers to facilities.

**Priority C**

7. Fence around soccer fields – fence would be installed around the soccer fields to control vehicle access (vehicles, 4 x 4's and snowmobiles would damage the turf) and reduce soccer balls onto adjacent property.
8. Scoreboards – One score board would be installed on the south east soccer field and one on the softball field.
9. Bridge in area of pond.

Established November 28, 1854

4.85 acres (211,266 square feet)
Neighborhood Park

Development Theme: Historic 1890's

Adopted By:
Sunrise Assembly of God
August 22, 2003

**Existing Facilities:**

- Community Center
- Dugouts with players bench
- Gazebo 42' in diameter
- Library
- Non-regulation sized softball diamond (1) - (160 feet outfield); backstop is 30 feet high
- Restroom Structure (20' x 30') consist of:
  - Handicapped Accessible stalls
  - Storage Room

**Playground:**

- Boomerang Play Structure
- TREEmendous Playground (120' x 80') – wooden play structure built by community volunteers

**Additional Park Amenities:**

- Benches (2)
- Cooking Grills (2) - Large
- Drinking Fountain
- Electric outlets at Gazebo, Restroom and pedestal on community center plaza
- Handicapped Sidewalk System
- Irrigation Hydrants (2)
- Picnic Tables scattered throughout the park

**Park Improvements Funded By Others:**

- Ball field fence - 2002 – Fence donated by Gustavus Adolphus College
- Bench – 2004 Andy & Ann Miller Family
- Boomerang Play Structure - 1998 - assembled by Minnesota Conservation Corps Personnel
- Land given to the city as a part of the original plat of the city in 1854
- Original Gazebo donated by Saint Peter Lions Club - reconstructed after tornado - 1999
- TREEmendous Playground - 2001 - Constructed and funded by volunteers as a community wide effort
- Trees replanted after tornado - 1998 - Applebee's Restaurant

9/12/2005

**Planned Improvements**

**Gorman Park Priorities**

**Priority A**

1. Add a soccer goal to be situated between the ball field in the northeast corner and the restroom structure
2. Develop passive picnic areas
3. Install three identification signs from salvaged sample panels of stone and brickwork from the new community center
4. Signage

**Jefferson Park East Activity Focus:**

- Neighborhood Park
- Softball

**Jefferson Park West Activity Focus:**

- Walking/running track

**Jefferson Park East Existing Facilities:**

- Concession Stand and Restroom Structure - 24 feet x 44 feet includes:
  - Refrigerator, Microwave, Pretzel Machine, Nacho Machine, Hot Dog Cooker
  - Freezer and walk-in cooler with taps
  - Cabinets for storage & counter top for food preparation
  - Storage Room
  - Handicapped accessible restrooms
- Drinking Fountains (3)
- Park Shelter constructed - 16 x 26 feet - located at parking lot entrance
- Picnic shelter with fenced tot lot play area (24 x 52)
- Softball Field One (Lighted) – 275 feet from home plate to outfield fence
  Scoreboard installed

9/12/2005

- Softball Field Two – 275 feet from home plate to outfield fence
- Softball Field Three – 275 feet from home plate to outfield fence
- Softball Field Four – (Lighted) 275 feet from home plate to outfield fence
  - Backstop for fields one (1) through four (4) are 30' high, 20' wide, with two 10' wings

**Jefferson Park West Existing Facilities:**
- Stormwater Basin - 9.34 acres

**Playground:**
- Play area is 45 x 70
  - Netting over playground to catch/stop balls
- Airplane Ride
- Dinosaur Ride
- Scrambler Whirl
- Slide
- Swing Set w/ (2) standard swings
- Swing Set w/ (2) infant swings
- Worm Climber

**Additional Park Amenities:**
- Batting Cage - Permanent & Wheeled
- Covered picnic table beside playground
- Drinking Fountains (3)
- Flagpole - Lighted
- Irrigation Hydrants (2)
- Parking 240 spaces total (2 lots)
- Picnic tables throughout the park
- Storage Buildings – Portable (3)

**Park Improvements Funded By Others:**
- Backstops – raised ten feet – donated by Girls Fast Pitch Softball
- Ball field shelter originally donated by the Adult Softball Association in 1988 – reconstructed in 1999 after the tornado
- Cooler in concession stand – 1999 – funded by the Adult Softball Association
- Flag Pole – American Legion – reconstructed in 1998 after tornado
- Flags for pole - American Legion
- Netting over playground – 2003- Adult Softball Association
- Original ball fields constructed as a community effort in 1975 – reconstructed in 1998 after tornado
- Original bathroom/concession stand constructed by Adult Softball Association in 1979 – reconstructed in 1999 after tornado
- Original park shelter donated by Adult Softball Association, moved to park entrance in 1988
- Players Benches in fields 1, 2 and 3 – Aid Association of Lutherans in 1979 – replaced after tornado in 1998
- Scoreboard – 1999 – donated by Pepsi
- Tot Lot -2002 – donated by Jaycees
- Trees between the fields donated by individuals
- Warning Tracks – 2002 – donated by the Adult Softball Association
- Underground Utilities (water/sewer) – donated labor and equipment by Willy Walters/Adult Softball Association

## Planned Improvements

**Jefferson Park Priorities**

**East of Nicollet Avenue:**

**Priority A**

1. Install handicapped access for shelter and concession stand
2. Install drain tile system on all fields (#1 currently has tile)
3. Handicapped Sidewalk
4. Install shade for bleachers
5. Install shade for dugouts
6. Install shade option in front of shelter to reduce heating up of the stainless steel shelf
7. Signage

**Priority C**

8. Install lights on all fields (#1 and #4 currently have lights)
9. Develop competition Horseshoe Courts
10. Add Sand Volleyball Courts
11. Install a large permanent bleacher for field #1

**West of Nicollet Avenue:**

**Priority A**

1. Add a rough softball field for pick up games – dual baseball/softball field
2. Add a soccer field with drinking fountain and field hydrant for watering
3. Plant trees and shrubs
4. Signage

**Priority B**

5. Add a Tot Lot
6. Add benches along the trail
