

# CITY OF SAINT PETER HOT SHEET

All the City news you need to know and a little bit more!  
City Info Line 507-934-0675 TDD #711  
The City of Saint Peter is an equal opportunity provider.

The following information is a publication of the City of Saint Peter, City Administrator's Office, 934-0663, 227 South Front Street. Please contact us at [barbaral@saintpetermn.gov](mailto:barbaral@saintpetermn.gov) [www.facebook.com/cityofsaintpeter](http://www.facebook.com/cityofsaintpeter)

08/12/15

**MAKES ME WONDER (BY CITY ADMINISTRATOR TODD PRAFKE) – COMMENTS AND MORE....** Thanks for the feedback on the HOT SHEET this past week. Your thoughts and input are very valuable to us and we

certainly appreciate the topic ideas and compliments from those of you who say they use the HOT SHEET as a primary source of information.

If we have one goal for the HOT SHEET it is to be just that, a primary source for information about the City. Maybe it is important to note that the folks that think the HOT SHEET is useless or dumb probably didn't see the HOT SHEET last week and therefore did not respond. I am very proud of the quality and quantity of information we push out including our use of FACEBOOK, vlog (Video Blog) or website and our experimentation with Twitter. The amount of effort that goes into these information resources is significant and the people that do it (including Barbara, Angie, Susan, Keith and Bill and many others) do a very good job.

Sometimes it is very challenging to balance all the information and time to push that info out. In the upcoming weeks I will write about some of the suggested topics you provided and please know that you can suggest a topic anytime, not just when we solicit them.

One last more philosophical note...Democracy is hard, you have to work at it, it takes a populous that has opportunity to and willingness to make the time to know and understand what is going on around them. Our sincere hope is that the HOT SHEET, Facebook postings and our website gives those interested in the hard work of Democracy much of the information they need to participate in the way

that they want. Will you keep reading the HOTSHEET? It makes me wonder.....

**CITY COUNCIL FILING ENDS** –The filing period for City Council positions has now ended. The following individuals have filed for City Council positions:

#### **MAYOR – vote for one**

Timothy Strand	Mayor
Chuck Zieman	Mayor

#### **COUNCILMEMBER WARD I – vote for one**

Jeff Brand	Council Ward I
Jill Niebuhr	Council Ward I
Thomas M. Geisler	Council Ward I
Brett Christensen	Council Ward I
Ed Johnson	Council Ward I

#### **COUNCILMEMBER WARD II – vote for two**

John Kvamme	Council Ward II
David B. McGuire	Council Ward II
Jerry Pfeifer	Council Ward II

Candidates have until 5:00 p.m. on Thursday, August 13th to withdraw from the ballot. Persons with questions regarding the election are encouraged to call the City Administrator's office at 934-0663.

**OUTDOOR POOL** – Enjoy these last days of summer before the outdoor pool closes for the season at the end of the day on Saturday, August 22nd!

**FALL ACTIVITIES AND CLASSES** - The seasonal joint brochure between the City of Saint Peter Recreation and Leisure Services Department and School District 508 Community and Family Education will be arriving in mailboxes this coming

weekend. If you don't get a brochure, extras are available at the Community Center or Library.

**ENERGY SAVING TIPS** - Everyone knows that as the temps rise our air conditioning costs go up. You can help limit the expense of air conditioning by following a few tips:

- Keep blinds and drapes closed on southern and westerly facing windows during the daylight hours.
- Be a speedy chef ...Nothing is more energy efficient for cooking than your microwave. It uses two-thirds less energy than your stove. Use your microwave or outdoor grill to cook during hot weather. Heating up the oven just makes your air conditioner work harder.
- Push a button to wash your dishes. Surprise! Your dishwasher uses less water than washing dishes by hand. Make sure you only run the dishwasher when it is full to save even more energy. Then let dishes air-dry to save even more!
- Fill up the fridge. Having lots of food in your fridge keeps it from warming up too fast when the door is open, so your fridge doesn't have to work as hard to stay cool.

Cutting back unnecessary energy use is an easy way to reduce energy consumption while saving money. Here are some additional suggestions you can do at home, at absolutely no cost to you.

- Turn up your thermostat. Set your thermostat to 78 degrees when you are home and 85 degrees or off when you are away. You will save 1-3% for each degree the thermostat is set above 72 degrees. Using ceiling or room fans allows you to set the thermostat higher because the air movement will cool the room.
- Do your laundry efficiently by using the warm or cold water setting for washing your clothes. Always use cold water to rinse clothes.
- Line dry clothes whenever you can.
- When you need to use the dryer, run full loads, use the moisture-sensing setting, and clean the lint trap after each use.
- Eliminate wasted energy. Turn off appliances, lights and equipment when not in use.
- Unplug electronic devices and chargers when they aren't in use. Most new electronics use electricity even when switched "off." Turn computers and printers off at the power strip.

- Unplug or recycle that spare refrigerator in the garage if you don't really need it. This will save you up to \$150 per year!

And for some inexpensive energy solutions, how about trying these ideas?

- Make a quick trip to the local hardware store to purchase inexpensive energy-saving tools and equipment.
- Replace air conditioner filters. Dirty filters restrict airflow and can cause the system to run longer, increasing energy use. Replace filters monthly for maximum benefit.
- Plug your home's leaks. Weather-strip, seal, and caulk leaky doors and windows and install foam gaskets behind outlet covers.
- Choose ENERGY STAR® products. Buy ENERGY STAR® certified table lamps and light fixtures, and replace your incandescent light bulbs that are used more than two hours per day with ENERGY STAR® compact fluorescent bulbs. For example, install compact fluorescent bulbs in your porch light if you leave it on overnight. For each bulb you'll save 0.2% for each hour the bulb operates on a typical day which means replacing an incandescent bulb that burns 10 hours per day will save 2%. The City offers rebates for certain energy star appliances so be sure and check out [www.saveenergyinstpeter.com](http://www.saveenergyinstpeter.com) for more information on rebates.
- Install an ENERGY STAR® programmable thermostat and make sure to program it!

**HOME WATER LEAK IDENTIFICATION** - If you feel that your water usage is continually high try the following:

- **Check your toilets for leaks** – Put a little food coloring in your toilet tank. If, without flushing, the color begins to appear in the bowl within a few minutes, you have a leak that should be repaired immediately. Most replacement parts are inexpensive and easy to install.
- **Check your faucets and pipes for leaks** – A small drip from a worn faucet washer can waste 20 gallons of water per day. Larger leaks can waste hundreds of gallons.
- **Check your softener for cycling** – Since the City is producing a much softer water, many

shutterstock - 77183257

residents have reduced use of their softeners. Some have discontinued use of a water softener all together. If you are still using a water softener, make sure the equipment is not "cycling" more often than needed to keep your water softness at the desired level. Check with your softener vendor to make sure your equipment is working at optimum levels.

Implementing these water conservation approaches saves precious groundwater and lowers personal water consumption which ultimately saves money.

**HELP WANTED** – The City of Saint Peter is currently accepting applications for the following positions:
