RATE NO. E-24 – INTERRUPTIBLE INDUSTRIAL (Coincident Summer Billing)

Criteria: Available in the City of Saint Peter service area to any nonresidential customers as a single business establishment when all service hereunder is provided through meters at a single point of delivery. Customers may begin using this rate on June first of each year for a twelve-month period, renewable annually.

This rate is for customers taking service concurrently under Rate No. E-4. This rate is for interruptible service to specific interruptible loads which are remotely controlled by the utility. The customer is to use this service for the connected loads when not being interrupted. Service under this schedule will typically be interrupted no more than 200 hours per year and no more than 10 hours on any day during utility system peak periods as established by the utility. The total of customers' loads permitted in this rate class will be limited to 1,500 KW, subject to possible increase with changing utility load profile. The utility will provide the meter and the load control unit to monitor and control the load. The customer will be responsible for the cost of installing the meter and control unit. Failure of the customer to provide the identified load interruption for the utility's annual billing peak hour (coincident with SMMPA's demand peak) will be cause for the customer to revert to the Rate Number E-4, Industrial, beginning in the month of failure and effective through June first of the following year.
